About me

Hello, I'm Hirut Assefa, a software tester at uTest with proficiency in testing. I have experience in creating comprehensive test documentation, including test scenarios, test cases, requirement traceability matrices, and bug reports. Additionally, I am familiar with defect management tools, Agile methods, web technologies, version control (Git/GitHub), MySQL databases, and API testing.

Projects

Project 1: Testing the registration form (manual testing)

- In this project I show my skills in manual testing. I thoroughly tested the registration form, which I created using HTML, CSS and Bootstrap. This project demonstrates my ability to create test scenarios, design test cases, ensure they meet requirements, and report any issues I find **[View source code](#)**

Project 2: Website for a marketing agency

- Frontend: HTML for structure, css for style and javascript for interactivity **[View source code](#)** **[view the web page](#)**
